ANNEXURE – II

Scope of work for the Security Audit

Primary objective of all Security Audit exercise is to identify major vulnerabilities in the website from internal and external threats. Once the threats are identified and reported the auditors should also suggest possible remedies.

Technical details of the applications are as follows:

Sr No	Parameters/information about the website	Description
1	Website URL	http://tempwebgoa333.nic.in
2	Operating system details (ie. windows-2003, Linux, AIX, Solaris, etc.)	Linux
3	Application server with version	Apache Server 2.2
4	Development platform for application: Front-end Tool (Server side scripts) (ie. ASP, Asp.NET, JSP, PHP, etc.)	PHP, CakePHP, Java script
5	Back-end database (MS-SQL Server, PostgreSQL, Oracle, etc.)	MYSQL
6	Authorization No. of roles & types of privileges for the different roles	Admin for content management and for form entry
7	Whether the site contains any content management module (CMS) (if yes then which?)	Yes, Word Press
8	No. of inputs forms	5
9	No. (approximate) of input fields	40
10	No. of login modules	2
11	How many application roles/privilege levels of users?	1
12	Does the application provide a file download feature (Yes/No)?	Yes
13	Does the application use client-side certificate (Yes/No)?	No
14	Is there a CMS (content Management System) present to maintain the public portal/login module?	Yes
15	Tentative testing environment (Development/Staging/Production box)	Staging
16	Does the application has SMS integration (Yes/No)?	No
17	Does the application has email integration (Yes/No)?	No
18	Does the application has payment gateway integration (Yes/No)?	No
19	Does the application provide a file upload feature (Yes/No)?	Yes in CMS
20	Details of total number of pages (static/dynamic & separate counting for separate platform/front end used) - count	
	Static pages (name of platform used to design)	47 pages
	Dynamic pages (name of front end tool used to design & develop)	30 pages
	Total pages	77 pages

To ensure that, the web site of Directorate of Technical Education is free from the vulnerabilities, the security audit exercise will need to undertake the following activities:

1. Identify the security vulnerabilities, which may be discovered during website security audit including cross-site scripting, broken links/weak session management, buffer overflows, forceful browsing, form/hidden field manipulation, command injection, insecure use of cryptography, cookie posing, SQL injection, server mis-configuration, well known platform vulnerabilities, errors triggering sensitive information, leak etc.
2. Identification and prioritization of various risks to the Directorate of Technical Education website.
3. Identify remedial solutions and recommendations for making the website secure.
4. Undertake user profiling and suggest specific access methodologies & privileges for each category of the users identified.
5. The auditors will have to carry out an assessment of the vulnerabilities, threats and risks that exist in Directorate of Technical Education website through internet vulnerability assessment and penetration testing. This will include identifying remedial solutions and recommendations for implementations of the same to mitigate all identified risks, with the objective of enhancing the security of the system.
6. The website should be audited as per the CERT-in standards. The auditor is expected to submit the final security audit report after the remedies/recommendations are implemented and confirmed with retest.
7. The security audit firm/company has to submit a summary compliance report at the end of the assessment phase and the final report will certify that Directorate of Technical Education website is compliant with the NIC standards.

Deliverables and Security Audit Reports

The successful bidder will be required to submit the following documents in printed format (2 copies each) after the security audit of above mentioned web site:

- i. A detailed report with security status and discovered vulnerabilities weakness and mis-configurations with associated risk levels and recommended actions for risk mitigation's.
- ii. Summary and detailed reports on security risk, vulnerabilities and audit with the necessary counter measures and recommended corrective actions to be undertaken by website vendor.
- iii. The final security audit certificate for the website should be in compliance with the NIC standards.
- iv. All deliverables shall be in English language and in A4 size format.
- v. The vendor will be required to submit the deliverables as per terms and conditions of this document.
